

BOND**PUB**

Build the fixed-income workflow your firm **needs**.

One API-first platform. Multiple ways to work.

BondPUB connects FTLabs applications, familiar tools and client-built experiences through common platform services, business logic and persistent data.

CONNECT IT.

Use BondPUB as the shared workflow foundation beneath FTLabs interfaces, internal applications and proprietary experiences.

AUTOMATE IT.

Support trader-assisted, rules-based and automated fixed-income workflows on the same foundation.

BUILD ON IT.

Extend BondPUB through familiar tools, programming interfaces and client-built applications.

CORE CAPABILITIES

API-FIRST. MODULAR. EXTENSIBLE. INTEGRATED.

One platform. Multiple ways to work.

BondPUB platform services

Common APIs, workflow services, business logic and persistent data across the BondPUB environment.

Multiple ways to work

BondPUB Trader, BondPUB Sales, Excel, Windows applications, Python and client-built interfaces.

WORKFLOW ARCHITECTURE

Connect data, logic and interfaces.

BOND PUB

Use what fits. Build what differentiates.

Extend the technology environment your firm already operates.

BondPUB provides the API-first foundation for shared workflow, business logic and persistent data while giving each team the interface and access it needs.

Built for workflow

Configure trader-assisted, rules-based and automated fixed-income processes.

Built for flexibility

Use FTLabs applications, familiar tools or proprietary interfaces on one foundation.

Built for IT teams

Coexist with Bloomberg, clearing providers, pricing systems and internal applications.

ONE PLATFORM. MULTIPLE WAYS TO WORK.

Shared foundation. Flexible access.

Ways to work

BondPUB Trader, BondPUB Sales, Excel, Windows, Python and client-built interfaces.

BondPUB platform services

Common API, workflow services, business logic and persistent data.

Data and analytics

Data adapters, reference data, pricing sources and Bond Analytics.

External connectivity

BondHUB, trading venues, clearing and downstream systems.

MODERNIZE WITHOUT WHOLESALE REPLACEMENT

Connect established systems. Add capabilities incrementally.

Data adapters read local or remote data and publish it to the BondPUB API for persistence. A separate proprietary API connects BondPUB directly to BondHUB.

INSTITUTIONAL FIXED-INCOME FOUNDATION

Experience. Technology. What's next.

More than 20 years of fixed-income technology experience

Configurable workflow and integration controls

Modular applications and capabilities

Persistent, auditable workflows
