

BOND**PUB** TRADER

Trade fixed income with speed, clarity and **control.**

A trader workspace built on the BondPUB platform.

BondPUB Trader gives fixed-income desks a modern interface for managing liquidity, positions, orders and execution while working on the shared services, workflows and persistent data of BondPUB.

SEE THE MARKET.

Monitor market data, quotes, liquidity and trader inputs in a workspace designed for the desk.

WORK THE ORDER.

Manage trader-assisted and rules-based workflows across pricing, order staging and order management.

EXECUTE WITH CONTROL.

Connect execution activity to analytics, connectivity and downstream workflows on the BondPUB foundation.

CORE CAPABILITIES

TRADER-READY. CONNECTED. CONFIGURABLE.

Built for the way traders work.

Market views & liquidity

View live market data, trader color, quotes and liquidity in one connected workspace.

Inventory & positions

Track inventory, positions and trading context with real-time visibility.

Order management

Stage, organize and manage orders across connected venues and workflows.

Execution workflows

Evaluate RFQs, manage execution decisions and complete trades efficiently.

Analytics & connectivity

Bring together pricing, analytics, BondHUB connectivity and downstream integration.

TRADER WORKFLOW

From market opportunity to execution.

01

See liquidity

Monitor quotes, axes, market color and reference data across the trading environment.

MARKETS • DATA

02

Manage positions

Review inventory, positions and trader context while identifying opportunities.

POSITIONS • ANALYTICS

03

Work the order

Consolidate RFQs and orders, apply workflow logic and prepare for execution.

WORKFLOW • PRICING

04

Execute with control

Complete trades and connect outcomes to post-trade and downstream processes.

EXECUTION • CONNECTIVITY
