FINANCIAL TECHNOLOGY LABORATORIES

PURPOSE-BUILT FOR FIXED-INCOME

BOND ANALYTICS

Foundational fixed-income analytics for the technology you build.

Bond calculations for applications, platforms and proprietary systems - available through .NET, C++, Java or an AWS-hosted OpenAPI.

.NET | C++ | JAVA | AWS OpenAPI

EMBED IT.

Use native libraries inside your application.

CALL IT.

Call analytics through the AWS-hosted OpenAPI.

BUILD ON IT.

Create proprietary products and workflows on a shared calculation layer.

CORE CAPABILITIES

INTEGRATED. FLEXIBLE. FUTURE READY.

EMBED IT

Native analytics libraries

Bring fixed-income calculations directly into your application.

Microsoft .NET | C++ | Java

CALL IT

OpenAPI on AWS

Call Bond Analytics over the web for cloud and distributed applications.

AWS-hosted | OpenAPI | On demand

BUILD ON IT

A shared analytics foundation

Build solutions around consistent bond calculations.

Trading | Pricing | Platforms

ENTERPRISE APPLICABILITY.

Use .NET, C++, Java or OpenAPI to deliver consistent analytics across order- and execution-management systems, vendor platforms and proprietary applications.

YOUR APPLICATION. BOND ANALYTICS UNDERNEATH.

Your data + inputs → Bond Analytics → Your application / platform

FITS INSIDE TRADING SYSTEMS, PRICING APPLICATIONS, PORTFOLIO PLATFORMS, DATA SOLUTIONS, INTERNAL TOOLS AND COMMERCIAL SOFTWARE PRODUCTS.

BOND ANALYTICS

Extend powerful bond analytics into your environment.

Flexible integration for the applications, platforms and trading technology you already build.

Bond Analytics gives your development team high-level interfaces for common requirements, with lower-level methods available when you need greater control.

BUILT FOR DEVELOPERS

High-level interfaces for common calculations, with lower-level access when applications require greater control.

SIMPLE TO USE | FULL FLEXIBILITY

BUILT FOR FIXED INCOME

Price/yield, yield to maturity, yield to call, duration, convexity and additional U.S. fixed-income measures.

ACCURATE | COMPREHENSIVE

BUILT TO FIT

Native libraries or web OpenAPI so analytics conform to your architecture - not the other way around.

INTEGRATE | DEPLOY | SCALE

U.S. FIXED-INCOME CALCULATION COVERAGE

Core analytics for U.S. domestic fixed-income securities.

- Price / Yield
- Duration
- Yield to Maturity
- Convexity
- Yield to Call
- Additional bond measures

BUILT ON DECADES OF FIXED-INCOME EXPERTISE. READY FOR YOUR APPLICATIONS, PLATFORMS AND WORKFLOWS.

INTERNATIONAL CALCULATIONS

Global FISA extends coverage beyond the U.S.

Global FISA extends calculation support to Canada, the United Kingdom, Japan, the European Union, France, Germany and Italy.

ADDITIONAL MARKETS.
SAME TRUSTED ANALYTICS.

EXPERIENCE GROUNDED IN THE FIXED-INCOME MARKET.

FTLabs has developed fixed-income technology since 2005. Bond Analytics can serve as the foundation calculation layer beneath proprietary applications, commercial software and other financial technology platforms.
